

City of Seattle
Edward B. Murray, Mayor

Department of Planning and Development
D. M. Sugimura, Director

**CITY OF SEATTLE
ANALYSIS AND DECISION OF THE DIRECTOR
OF THE DEPARTMENT OF PLANNING AND DEVELOPMENT**

Application Number: 3014188
Applicant: Einar Novion
Address of Proposals: 7029 35th Avenue NE

SUMMARY OF PROPOSED ACTION

Land Use Application to allow two, 2-unit townhouse structures and one, 4-unit townhouse structure for a total of eight units. Surface parking for eight vehicles to be provided. Existing buildings to be demolished. Environmental Review includes future unit lot subdivision.

The following approvals are required:

SEPA-Environmental Determination (SMC 25.05)

SEPA Determination: ☐ Exempt ☒ DNS ☐ MDNS ☐ EIS
☐ MDNS with conditions
☐ DNS involving non-exempt grading or demolition or
involving another agency with jurisdiction.

Site Description:

The subject site is located on the west side of 35th Avenue NE between NE 70th Street and NE 73rd Street. The site consists of two parcels each containing an existing single family structure. The site is mostly flat but is located above the 35th Avenue NE sidewalk where an existing three foot rockery is located.

The site is zoned Lowrise Two (LR2) multifamily, as are the properties to the north and south. To the east zoning is Neighborhood Commercial One (NC1-30) and to the west zoning is Single Family (SF5000).

ECAs:

No Environmentally Critical Areas have been identified on site.

Access:

The site is bordered by 35th Avenue NE to the east and an improved alley to the west. Access to parking is provided by the alley.

Public Comment:

The Notice of Application comment period ended on March 12, 2014. Multiple public comments were received.

SEPA ANALYSIS

Environmental review resulting in a Threshold Determination is required pursuant to the Seattle State Environmental Policy Act (SEPA), WAC 197-11, and the Seattle SEPA Ordinance (Seattle Municipal Code Chapter 25.05)

The initial disclosure of the potential impacts from this project was made in the environmental checklist submitted by the applicant dated January 28, 2014. The Department of Planning and Development has analyzed and annotated the environmental checklist submitted by the project applicant, reviewed the project plans and any additional information in the file, and pertinent comments which may have been received regarding this proposed action have been considered.

As indicated in the checklist, this action may result in adverse impacts to the environment. However, due to their temporary nature and limited effects, the impacts are not expected to be significant.

The SEPA Overview Policy (SMC 25.05.665) clarifies the relationship between codes, policies, and environmental review. Specific policies for each element of the environment, and certain neighborhood plans and other policies explicitly referenced, may serve as the basis for exercising substantive SEPA authority. The Overview Policy states, in part, "Where City regulations have been adopted to address an environmental impact, it shall be presumed that such regulations are adequate to achieve sufficient mitigation" subject to some limitations.

Codes and development regulations applicable to this proposed project will provide sufficient mitigation for many short and/or long term impacts. Applicable codes may include the Stormwater Code (SMC 22.800-808), the Grading Code (SMC 22.170), the Street Use Ordinance (SMC Title 15), the Seattle Building Code, and the Noise Control Ordinance (SMC 25.08). Puget Sound Clean Air Agency regulations require control of fugitive dust to protect air quality. Additional discussion of short and long term impacts is found below.

Short Term Impacts

The following temporary or construction-related impacts are expected: temporary soil erosion; decreased air quality due to increased dust and other suspended air particulates during excavation, filling and transport of materials to and from the site; increased noise and vibration from construction operations and equipment; increased traffic and parking demand from construction personnel traveling to and from the work site; consumption of renewable and non-renewable resources; disruption of utilities serving the area; and conflict with normal pedestrian movement adjacent to the site. Compliance with applicable codes and ordinances will reduce or eliminate most adverse short-term impacts to the environment.

Noise - The project is expected to generate loud noise during demolition, grading and construction. These impacts would be especially adverse in the early morning, in the evening, and on weekends.

The Seattle Noise Ordinance permits increases in permissible sound levels associated with construction and equipment between the hours of 7:00 AM and 7:00 PM on weekdays and 9:00 AM and 7:00 PM on weekends. If extended construction hours are desired, the applicant may seek approval from DPD through a Noise Variance request. The applicant's environmental checklist does not indicate that extended hours are anticipated. The limitations stipulated in the Noise Ordinance are sufficient to mitigate noise impacts; therefore no additional SEPA conditioning is necessary to mitigation noise impacts.

Greenhouse gas emissions - Construction activities including construction worker commutes, truck trips, the operation of construction equipment and machinery, and the manufacture of the construction materials themselves result in increases in carbon dioxide and other greenhouse gas emissions which adversely impact air quality and contribute to climate change and global warming. While these impacts are adverse, they are not expected to be significant due to the relatively minor contribution of greenhouse gas emissions from this project.

No further conditioning or mitigation is warranted pursuant to specific environmental policies or the SEPA Overview Policy (SMC 25.05.665).

Long Term Impacts

Long term or use-related impacts are also anticipated as a result of this proposal, including: increased surface water runoff due to greater site coverage by impervious surfaces; increased bulk and scale on the site; increased traffic in the area and increased demand for parking; increased demand for public services and utilities; loss of plant and animal habitat; and increased light and glare.

Several adopted City codes and/or ordinances provide mitigation for some of the identified impacts. Specifically these are: the Drainage Code which requires on site detention of Stormwater with provisions for controlled tight line release to an approved outlet and may require additional design elements to prevent isolated flooding; the City Energy Code which will require insulation for outside walls and energy efficient windows; and the Land Use Code and Design Review process which controls site coverage, setbacks, building height and use and contains other development and use regulations to assure compatible development. Compliance with these applicable codes and ordinances is adequate to achieve sufficient mitigation of most long term impacts, although some impacts warrant further discussion.

Greenhouse gas emissions - Operational activities, primarily vehicular trips associated with the project and the projects' energy consumption, are expected to result in increases in carbon dioxide and other greenhouse gas emissions which adversely impact air quality and contribute to climate change and global warming. While these impacts are adverse, they are not expected to be significant due to the relatively minor contribution of greenhouse gas emissions from this project.

No further conditioning or mitigation is warranted pursuant to specific environmental policies or the SEPA Overview Policy (SMC 25.05.665).

DECISION – SEPA

This decision was made after review by the responsible official on behalf of the lead agency of a completed environmental checklist and other information on file with the responsible department. This constitutes the Threshold Determination and form. The intent of this declaration is to satisfy the requirement of the State Environmental Policy Act (RCW 43.21.C), including the requirement to inform the public of agency decisions pursuant to SEPA.

- ☒ Determination of Non-Significance. This proposal has been determined to not have significant adverse impact upon the environment. An EIS is not required under RCW 43.21.030(2) (c).

The lead agency for this proposal has determined that it does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21C.030 (2)(c). This decision was made after review of a completed environmental checklist and other information on file with the lead agency. This information is available to the public on request.

This DNS is issued after using the optional DNS process in WAC 197-11-355 and Early review DNS process in SMC 25.05.355. There is no further comment period on the DNS.

CONDITIONS - SEPA

None required.
